DETAILED ACTION

1. Applicants are hereby informed that the prosecution in this case is hereby re-opened in view of the Board decision dated 09/30/03.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Renzi et al '293.

This common-inventor patent is of record in the previous Office Actions, and discloses liquid glass-forming composition from DAC and diol mixture. The cited prior art discloses a ratio of (C) in the (B+C) mixture of equal to or less than 70 % by weight, preferably from 20 to 60 % by weight. All the other limitations in the claims being disclosed by this prior art, it is the Examiner's position that the claims would have been obvious over the disclosures of the prior art, absent a showing of clear and convincing unexpected results.

3. Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
